CAREER OBJECTIVE

Aspiring Full Stack Developer and AI/ML pursuing a B.Tech in Artificial Intelligence & Machine Learning, with hands-on experience in Python, machine learning model development, and end-to-end web application design. Skilled in building intelligent, data-driven solutions and integrating ML models into scalable frontend and backend systems. Passionate about solving real-world problems through innovative engineering, and eager to contribute to a dynamic organization where I can apply both AI expertise and full-stack development skills while continuously learning and growing..

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML, CSS

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Machine Learning: Regression, Classification, Data Preprocessing, Model Evaluation

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, Flask

Databases: MySQL, SQLite, SQL, Supabase

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Power BI, Linux

PROFESSIONAL EXPERIENCE

Competitive Programming & Problem Solving

- Solved 250+ coding problems on HackerRank across Data Structures, Algorithms, SQL, and Java. Strong foundation in problem-solving, algorithm design, and debugging.

PROJECT HIGHLIGHTS

• Research Project :

Stacked Ensemble Model for Company Credit Risk Prediction with Web App : Designed an AI-based credit risk prediction system using a stacked ensemble of LightGBM, XGBoost, CatBoost, and Logistic Regression. Performed data preprocessing, feature engineering, SMOTE-based balancing, and hyperparameter tuning, achieving ~99% accuracy and ~97% F1-score on a 92K-record financial dataset. Developed a Streamlit web app for model training, evaluation, and real-time risk prediction.

• Industry Project :

Karmic HRMS : Python, FastAPI, NLP, Machine Learning, SBERT

Developed an intelligent HRMS platform featuring Resume Analysis, Workforce Intelligence, Behavioral Analysis, and Stress Prediction modules. Built NLP and ML-based solutions for skill extraction, job role prediction, project skill matching, team compatibility evaluation, personality assessment, and workforce analytics using SBERT embeddings, Logistic Regression, and explainable AI techniques. Designed scalable REST APIs and automated reporting workflows to support data-driven HR decision-making.

- **GreenVolt – Solar Service Management System : Flutter, React.js, Node.js, Supabase, Vercel, Render**
Developed a solar service management platform with customer and staff management, service scheduling, automated reminders, field-service tracking, and photo-based service reporting. Built web and mobile modules for service assignment, schedule management, and maintenance workflow automation using Supabase for backend services and Vercel/Render for deployment.

RESEARCH & CONFERENCE CONTRIBUTIONS

Abstract Accepted – International Conference on Multidisciplinary Emerging Trends in Engineering and Technology (ICMETET 2024)

ISBM College of Engineering, Pune | 2024

- Co-author of the abstract titled “**Securing Access: A Multi-Modal Biometric Door Lock System with Arduino and Two-Factor Authentication.**”
- Abstract accepted under **Track 5: Information and Communication Technology** (Abstract ID: ICMETET-2024/Abs/027).
- Contributed to system design, biometric authentication workflow, and hardware–software integration concepts.

Research Paper Published – TIJER | 2026

- Co-author of “**A Comparative Study of Keyword Extraction Methods Using TF-IDF, TextRank, and BERT with Multilingual Support and Interactive Visualization.**”
- Worked on NLP model development, multilingual keyword extraction, system evaluation, and Flask-based application implementation.

EDUCATION

•B.Tech – Artificial Intelligence & Data Science (Pursuing)

Vishwakarma University, Pune | 2023 – 2027

12th HSC: 75.83%

EXTRA EDGE

- Strong public speaking skills with experience anchoring college events.
- Creative thinker who conceptualized and led college tech-fest workshops.

LANGUAGES :

English | Marathi | Hindi

CERTIFICATIONS:

- Project Management Foundations — LinkedIn Learning (Jan 2025)
- Python Using AI — AI for Techies (July 2025)
- .NET Full Stack Developer — IBM / Board Infinity (Oct 2025)
- IBM Full Stack Software Developer — IBM (Oct 2025)
